Ms. Rebecca Thomas
Senior Analyst, Federal Registrations
The Scotts Company
14111 Scottslawn Road
Marysville, OH 43041

Subject: Notification per PRN 98-10 – Addition of local fertilizer application statements
Product Name: 0.08% Meso + Fertilizer
EPA Registration Number: 538-317
Application Date: January 18, 2019
Decision Number: 548035

Dear Ms. Thomas:

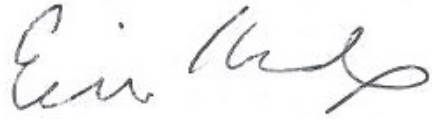

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you have any questions, please contact BeWanda Alexander at (703)347-0313 or by email at alexander.bewanda@epa.gov.

Sincerely,

A handwritten signature in dark ink, appearing to read "Erik Kraft", with a stylized flourish at the end.

Erik Kraft, Product Manager 24
Fungicide and Herbicide Branch
Registration Division (7505P)
Office of Pesticide Programs

Underlined text is new. Strikethrough text is deleted.

CAUTION: Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID [Icon]

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes.
Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor immediately for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. [Call: 1-XXX-XXX-XXXX]

ENVIRONMENTAL HAZARDS [Icon]

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies or drainage systems.

STORAGE AND DISPOSAL [Icon]

PESTICIDE STORAGE: Store in a cool, dry place. Reseal bag by [using zip close/using press to close zipper]/[folding top down and securing]

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. **If Empty:** Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

[How and When to Apply]

[Application]

OPTION 1 – DIRECTIONS FOR USE

000538-00317.20190118.NOTIF

[Highlighted Copy]

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.
[Bracketed information is optional text]. Text separated by / denotes and/or options.
Underlined text is new. Strikethrough text is deleted.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Information

For use on newly seeded, overseeded, or newly planted Kentucky bluegrass, tall fescue, perennial ryegrass, centipedegrass, as well as fine fescues [(creeping red, chewings and hard)].

[This product / [0.08% Meso + Fertilizer] is for application to home lawns and applies 0.15 pounds of mesotrione per acre per application. The maximum application rate of mesotrione per treatment site per year is 0.45 pounds.] This package applies 4.3 pounds of product per 1,000 sq. ft.

Apply this product / [0.08% Meso + Fertilizer] before watering newly seeded / overseeded / planted grass for the first time.

New weeds will sprout white or turn white and quickly die. This product will not kill existing weeds.

Restrictions

Do not apply this product in a way that will contact any person, or pet either directly or through drift. Keep people and pets out of the area during application. Do not enter or allow people or pets to enter the treated areas (except those involved in the watering) until the watering-in is complete and the surface is dry. Do not use this product on flowers, shrubs, trees, fruit or vegetable plants. Cana, day lilies and irises are especially susceptible to injury. Do not apply another pesticide within seven days of an application of this product as turf injury may occur. Do not apply to St. Augustine[grass], bentgrass, bermudagrass, zoysiagrass, dichondra, kikuyugrass, bahiagrass or lippia. This product applies 0.15 pounds of mesotrione per acre per application. The maximum application rate of mesotrione per treatment site per year is 0.45 pounds.

Application Instructions

Apply on a calm day and lightly water to activate. Apply when temperatures are consistently between 60°F and 90°F. Avoid applying to adjacent flower beds when using a rotary spreader.

This product / [0.08% Meso + Fertilizer] may cause temporary whitening of grass foliage. In general, symptoms appear five to seven days after application and may last up to 14 days. Discoloration is most likely to occur on ryegrass lawns.

NOTE:

EPA Reg. No. 538-317

SPREADER SETTING INFORMATION **Note to PM: The following is optional spreader setting information. Appropriate spreader settings, spreader brand names, and coverage will be inserted on Final Printed Label**

Spreading Settings/Information

[This package applies 4.3 lbs of product per 1,000 sq. ft.]

[Covers X,XXX sq. ft.]

Apply header strips. Then apply product in longest direction of lawn. For best results, use a Scotts® spreader. Shut off spreader or stop each time you reach a header strip.

[Spreader]	[Setting]
Scotts® Broadcast/Rotary Spreaders	
Turf Builder® Edgeguard® DLX, Turf Builder® Edgeguard® Mini, Scotts Basic™, Standard™, Deluxe™ Edgeguard®, Lawn Pro® or SpeedyGreen®	XX

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.**[Bracketed information is optional text]. Text separated by / denotes and/or options.****Underlined text is new. Strikethrough text is deleted.**

Each pass should be within 5 feet of each other to ensure an overlap.	
Scotts EasyGreen®	XX
Make each pass about 30 inches from previous pass to overlap spread width	
Scotts Drop Spreaders	
Scotts AccuGreen® Spreaders	XX
Make sure spreader wheel completely overlaps previous wheel marks.	

Spreading Tips

- For best results, use a Scotts spreader.
- Mow lawn first if grass is tall enough to touch the bottom of the spreader.
- Apply header strips. Then apply product in longest direction of lawn.
- Shut off spreader anytime you stop.
- Use [only] with Scotts spreaders.
- Scotts products are designed to work with Scotts spreaders.
- Non-Scotts spreader settings are approximate. You may need to adjust for proper coverage.
- For additional spreader settings, please call 1-800-543-TURF (8873).

[Bracketed information is optional text]. Text separated by / denotes and/or options.

Underlined text is new. Strikethrough text is deleted.

Florida Fertilizer Applications: [Do not exceed/May apply up to] 4 annual feedings [4 lbs. N/1000 sq. ft. per year] with the following exceptions: On centipedegrass do not exceed 2 feedings [2 lbs. N/1000 sq. ft. per year] in the north and 3 feedings [3 lbs. N/1000 sq. ft. per year] in the central and south.

North Florida is defined as north of a line extending from Cedar Key to Daytona Beach. Central Florida is defined as south of the line extending from Cedar Key to Daytona Beach to a line extending from Tampa to Vero Beach. South Florida includes the remaining southern portion of the state.

In Florida, 4 feedings may exceed the Nitrogen limits on certain grass types in some [geographic] areas.

Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices [for feeding your lawn.]

Check with your county or city government to determine if there are local regulations for fertilizer use.

OPTIONAL TEXT AND CLAIMS

The following pesticidal, fertilizer or general benefit claims may appear on any label panel.

The following claims may be preceded by “new” or “now” for six (6) months from the first date of shipment to a customer in accordance with Federal and State Registrations

Appropriate fertilizer, formula, company and product specific information will be inserted on Final Printed Label

WHAT TO EXPECT

- Weeds may emerge white, or emerge green and quickly turn white, but will soon wilt and die
- New weeds will sprout white or turn white and die
- [New] weeds sprout white & die quickly
- Weeds turn white and die fast
- Product may cause temporary whitening of grass foliage. See back of package for details.
- Some grass types may temporarily have white blades, but will [soon] grow in thick and green

CLAIMS

- [0.08% Meso + Fertilizer] Gives / Provides newly planted / seeded / overseeded / new grass the food / proper nutrition it needs to grow [in] [sooner / faster / quicker, thicker, and with less water] / [quicker and thicker] than unfed grass while also preventing some of the most bothersome weeds like ***insert any listed weed*** [from spoiling / choking / ruining your [fresh new] grass]
- [Use] [0.08% Meso + Fertilizer] [when growing new grass / seeding to] prevent[s] some of the most bothersome weeds like ***insert any 6 week prevention weed from weed list*** for up to 6 weeks while also giving / providing new grass the food / nutrition / essential nutrients it needs to grow [in] [sooner / faster / quicker, thicker, and with less water] / [quicker and thicker] than an unfed lawn
- 0.08% Meso + Fertilizer is a 2 in 1 solution for new grass. It prevents some of the most bothersome weeds like ***insert any 6 week prevention weed from weed list*** for up to 6 weeks while also giving new grass / grass seed the food it needs to grow [in] [sooner / faster / quicker, thicker, and with less water] / [quicker and thicker] than an unfed lawn
- With [0.08% Meso + Fertilizer] [*Icon*] – Without [0.08% Meso + Fertilizer] [*Icon*] – ***Note to PM: this claim will be a side by side image of a lawn that was treated with 0.08% Meso + Fertilizer after seeding and a lawn that was not treated with 0.08% Meso + Fertilizer after seeding.***
- Fed [*Icon* – lawn fed with 0.08% Meso + Fertilizer] – Unfed [*Icon* – unfed lawn]
- *Icon* – lawn fed with 0.08% Meso + Fertilizer
- Safe for seeding [*Icon*]
- Safe for new grass [*Icon*]
- Won't harm new grass / seedlings / newly planted grass / grass seed [*Icon*]
- Designed to improve seeding success / results [*Icon*]
- [Also] great for [planting] [grass] seed / sod / sprigs / [grass] plugs [*Icon*]
- Improves seeding results / performance [Guaranteed] [*Icon*]
- Planting Grass? Start it off Right [with 0.08% Meso + Fertilizer]

APPLICATION CLAIMS

- [New!] [Ideal for] [Use when / for] [Apply when] [planting new] grass / seed / sod / sprigs / plugs / seeding / sodding / sprigging / plugging / overseeding / reseeding
- [New!] Use when patching [bare spots], overseeding / reseeding, or establishing a new lawn
- [New!] [Use] for / when repairing bare spots, overseeding / reseeding, planting a new lawn
- [New!] [0.08% Meso + Fertilizer]
- Feeds new seed & sod
- Grows new seed / sod / grass thicker & quicker
- Apply when overseeding / reseeding / growing / planting [new grass] / [grass seed]
- For use when growing / establishing / seeding new grass!

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional text]. Text separated by / denotes and/or options.

- For best results, apply to a dry lawn then lightly water in
- [Specially] designed [for] / [to be used when] [seeding] / [planting [new] grass seed / overseeding / reseeding / sod / sprigs / plugs]
- Can be used when planting grass seed / sod / sprigs / grass plugs [*con*]
- Use with Scotts® Turf Builder® Grass Seed!
- Use when repairing bare areas, overseeding / reseeding or establishing a new lawn

OVERARCHING CLAIMS

- [Developed / Formulated to give you [the]] / [For] Scotts [best / ultimate] [seeding / sodding] experience / success [[in] growing / establishing new grass]!
- [Get Scotts best / ultimate seeding / sodding experience [[in] growing / establishing new grass]!
- [Exclusive formula] / [New technology] / [Scotts technology / innovation] is changing the seeding / sodding experience [in / for growing / establishing new grass]!
- Only Scotts can bring / give / enable you [to have] this [seeding / sodding] experience / success [[in] growing / establishing new grass]!
- Guaranteed to give you [your best] [seeding / sodding] experience [in growing / establishing new grass]!
- Have / Get success with [Scotts] 0.08% Meso + Fertilizer
- Contains the / an [exclusive formula] / [new technology] / [Scotts technology] / [Scotts] innovation] to help you succeed / [have / get Scotts best / ultimate [seeding / sodding] experience / success [[in] growing / establishing new grass]!
- For Scotts best / ultimate experience / success [in] growing / establishing new grass[, choose 0.08% Meso + Fertilizer]!
- [New] [0.08% Meso + Fertilizer] for Scotts best / ultimate success / experience in weed prevention while growing new grass!
- For use on [*insert any listed grass type*]

FERTILIZER CLAIMS

- Build / Grow a better lawn with / using less water than an unfed lawn
- Builds / Grows / Promotes thick, green turf / lawns / grass [from the roots up]
- Builds stronger, deeper roots [for winter / spring]
- Promotes [a] deep, even greening
- Feeds and strengthens [lawn / new grass] [against heat and drought]
- See a thicker, greener lawn next spring
- Starts working immediately
- Feeds new grass and strengthens / fortifies your existing lawn's root system
- Feed new grass and strengthen / fortify [your / the / existing] grass / lawn / turf / [green space] for faster drought recovery
- Thickens [the] lawn to [help] crowd out weeds / moss
- Feeds up to X months/ X weeks!
- Promotes root growth and accelerated grass development
- Contains nutrients your new grass needs to thrive
- [0.08% Meso + Fertilizer] helps new grass develop a healthy root system that helps protect it from [heat & drought] / [summer stresses]
- Grow/build a better [*insert any listed grass type*] lawn with / using less water.* *vs an unfed lawn
- Builds / grows / promotes thick green grass / [*insert any listed grass type*] [from the roots up]
- Build stronger / deeper roots [that use water [and nutrients] better / more efficiently]
- Contains timed / controlled / extended / [slow-release] nitrogen [for extended [*insert any listed grass type*] feeding]
- Feed new [*insert any listed grass type*] / grass/ lawn.
- Feeds new grass and helps existing lawn repair / recover from summer [drought] / heat damage [to lawns]
- [Patented / Exclusive timed / controlled / extended / slow / -release formula / fertilizer] builds / grows thick, green [*insert any listed grass type*] lawns from the roots up without burning your lawn [guaranteed]!
- Quick greening and extended feeding [for a lush / thick / beautiful / green / strong / great [Southern / Texas] lawn.]
- Timed / controlled / extended / slow / -release nitrogen won't burn your lawn [or cause surge growth]

NOTE:

SCOTTS ADVANTAGE® PARTICLE TECHNOLOGY

The **Scotts Difference** – Unlike many fertilizers, every particle of 0.08% Meso + Fertilizer contains:

- Scotts patented timed released nitrogen
- [Phosphorus]
- Potassium

[Artwork: NPK]

The Scotts Advantage®

Each of Scotts exclusive All-in-One Particles®* contains the guaranteed feeding of nutrients and weed preventer to provide consistent feeding and weed prevention to every treated square inch of your lawn.

The result: A thick, green weed-free lawn without burning. **GUARANTEED!**

*All-in-One Particles® = nitrogen, phosphorus, potassium and weed preventer ingredient contained in every particle

Planting new grass? Start it off right!

Just like people need the right food to grow and develop, [your] new grass also has special nutritional needs. [This product] / **[Insert Brand Name]** is specially designed to be used when planting new grass. It contains the / a [[perfect] balance] / [combination] of nutrients to help your new lawn grow strong roots and to grow in thick[er] and fast[er] [than if not fed at all]. Plus, it prevents bothersome weeds like dandelions and crabgrass [for [up to] 6 weeks] without harming your new grass!

[Insert Brand Name] can be used anytime you're planting new grass, whether it's starting a new lawn [or] reseeding / overseeding an existing one [or installing / planting sod / sprigs / grass plugs.]

[For [the / your] [ultimate Scotts® Lawn] [best lawn], use with [Scotts® Turf Builder® LawnSoil] / [Scotts® Turf Builder Grass Seed!]] **[Icon]**

How to Care for Your New Grass**[Watering] [Water Icon]**

After you've planted your new grass, continue to water at least twice a day (or more frequently if the weather is hot), until it has been mowed 1-2 times. [Once your new grass is established, you can go back to a normal watering routine.]

Feeding] [Feeding Icon]

Note to PM: There are two different Feeding options within the How to Care for Your New Grass section. Either Option 1 or Option 2 will appear in its entirety on the final printed label if the How to Care for Your New Grass section is used.

Feeding Option 1:

Feeding is important for all lawns, but it's especially important for new grass plants. To keep your new grass growing and to maintain a thick, green appearance; provide a follow-up feeding in 2-4 weeks with Scotts® Turf Builder® Lawn Food. [Once your new grass is established,] continue with regular feedings every 6 - 8 weeks [to provide the nutrients your lawn needs to crowd out weeds and withstand the stresses of heat, drought, and family activity.]

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional text]. Text separated by / denotes and/or options.

Underlined text is new. Strikethrough text is deleted.

Feeding Option 2:

Feeding is important for all lawns, but it's especially important for new grass plants. To keep your new grass growing and maintain a thick, green appearance; provide a follow-up feeding in 2-4 weeks with **[Scotts® Turf Builder® Starter® Food for New Lawns]**. [If you live in an area where Phosphorous applications are restricted / limited, feed with Scotts® Turf Builder® Lawn Food instead.] [Once your new grass is established,] continue with regular feedings every 6-8 weeks [to provide the nutrients your lawn needs to crowd out weeds and withstand the stresses of heat, drought, and family activity.]

[Mowing] [Mowing Icon]

If you've seeded bare spots or a whole lawn, wait to mow the area until the new grass is at least 3 inches tall. [If you've seeded over your existing lawn, you can mow as needed, but try to cut back the frequency to limit traffic on the new seedlings.][Cut your grass only when it's dry and avoid mowing too short. You only need to remove [approximately/about] 1/3 of the height.]
[Treating Weeds] [Weed Icon]

Wait until you've mowed your new grass at least 4 times before treating the new grass with a crabgrass preventer or other weed-control product. [Always read the product label for specific information related to the weed-control product you are using.] [This product prevents weeds for 6 weeks.]

[Treating Bugs] [Bug Icon]

Most bug-control products can be used any time on newly planted grass. [Always read the product label for specific information related to the pest-control product you are using.]

Scotts & Your Environment

- We Care – Scotts products are designed with care to grow thicker, greener lawns.
- [Because] A Green Lawn Is A Good Lawn[®] – A healthy lawn can clean the air, produce oxygen and prevent runoff and soil erosion.
- [You Can] Make a Difference – Help keep our water resources clean. Apply this product only to your lawn. And sweep any product that lands on the driveway, sidewalk or street back on to your lawn.
- [Read and follow package recommendations and instructions for use.]

Note to PM: If this section appears on the Final Printed Label the language will appear in its entirety

[Water Smart®] Tips for Lawncare Success

- Feed Regularly For Your Best Lawn. [Regular feedings of 0.08% Meso + Fertilizer will help grow / build a lawn you and your family can enjoy. 0.08% Meso + Fertilizer provides the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought and family activity.]
- Mow Your Lawn high. [Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively.]
- Leave The Grass Clippings On Your Lawn. [This recycles plant nutrients back into the soil.]
- Conserve Water. [Your lawn will begin to wilt when water is needed. As much as possible, take advantage of nature's sprinkler and rely on the rain to water your lawn.]
- [Gives new grass essential nutrients needed go grow a deep and dense root system that [is better able to absorb water and nutrients [and]] / [make the most of every drop.] / [than an unfed lawn.]]

[/con] [[Scotts] Water Smart] Water Smart [Makes the most of every drop.]

Well-fed lawns are more efficient at using available water. Feeding with Scotts® [Water Smart] fertilizer / lawn food helps grow / build a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses.

Some of the materials that are chemical-resistant to this product are listed below.

Applicators and other handlers must wear: Long-sleeved shirt, long pants, socks and shoes, and chemical-resistant gloves made of any waterproof material such as polyethylene or polyvinyl chloride.

User Safety Requirements:

Follow manufacturer's instructions for cleaning/maintaining Personal Protective Equipment. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations:**Users should:**

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinsate.

Surface Water Advisory

This product may contaminate water through drift of spray in wind. This product has a high potential for runoff for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Sound erosion control practices will reduce this product's contribution to surface water contamination.

DIRECTIONS FOR USE

It is a violation to use this product in manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional text]. Text separated by / denotes and/or options.

Underlined text is new. Strikethrough text is deleted.

greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about Personal Protective Equipment (PPE) and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT ENTER OR ALLOW WORKER ENTRY INTO TREATED AREAS DURING THE RESTRICTED ENTRY INTERVAL (REI) OF 12 HOURS. Exception: If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water, is:

- Coveralls
- Shoes plus socks
- Chemical resistant gloves of any waterproof material

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

Do not allow people or pets to enter treatment area until the application is complete and the grass is dry.

INFORMATION

For use on newly seeded or over-seeded established plantings of the following grasses: Kentucky bluegrass, [centipedegrass], tall fescue, fine fescue (creeping red, chewings, hard), and perennial ryegrass.

Mesotrione may be applied to home lawns, recreational areas, golf courses and sod farms.

This product contains 0.15 pounds of mesotrione per acre per application. The maximum number of broadcast applications per site per year is three. Do not apply more than 0.45 pounds of mesotrione active ingredient per treatment site per year.

Apply on a calm day.

When making applications to newly seeded and over seeded established lawns and turf, apply mesotrione impregnated on fertilizer as the last step in the planting process.

Best results will be obtained if to ¼ to ½ inch of water is provided by rainfall or irrigation within three days of treatment. Dry conditions following application may reduce herbicide activity.

Mesotrione may cause temporary whitening of turfgrass foliage. In general, symptoms appear five to seven days after application and may last up to 14 days. Discoloration is most likely to occur on ryegrass lawns and turf.

RESTRICTIONS

- Do not use this product on flowers, shrubs, trees, fruit or vegetable plants. Cana, day lilies and irises are especially susceptible to injury.
- Do not graze or feed livestock forage from areas treated with this product.
- Do not treat golf course greens with this product.
- Do not apply to Bentgrass, Bermudagrass (common), improved seeded Bermudagrass, Zoysiagrass, Dichondra, Kikuyugrass, Bahiagrass or Lippia lawns and turf.
- Do not apply an organophosphate or carbamate insecticide within seven days of an application of this product as turf injury may occur.

APPLICATION INSTRUCTIONS**Newly Seeded or Over Seeded Areas**

NOTE:

EPA Reg. No. 538-317

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional text]. Text separated by / denotes and/or options.

Underlined text is new. Strikethrough text is deleted.

Mesotrione applied at planting prevents the emergence of crabgrass seedlings and controls broadleaf weeds without harming desirable turf grasses listed below. Turfgrass and lawns may be seeded and weeds controlled at the same time. Apply mesotrione impregnated on fertilizer as the last step in the planting process.

Spring Seeding: For control of crabgrass, common chickweed, mouse ear chickweed, henbit, corn speedwell, hairy bittercress, heal-all, woodsorrel, dollar weed, volunteer bentgrass, dandelion, white clover, black medic, hop clover, nimblewill, ground ivy, broadleaf plantain, buckhorn plantain, Carolina plantain, hedgeweed, old world diamond flower, tufted lovegrass, Shepherd's purse, Florida pusley, common purslane, common lambsquarters, pigweed, kochia, wild violets, and other broadleaf weeds. Apply 187 pounds of fertilizer (0.15 pounds active ingredient per acre of mesotrione impregnated on fertilizer) per acre of turf. [Apply 4.3 lbs. of this product per 1000 sq. ft.] Apply to newly seeded or to over-seeded established plantings of the following grasses: Kentucky bluegrass, [centipedegrass], tall fescue, fine fescue (creeping red, chewings, hard), and perennial ryegrass. Mesotrione may reduce the density of fine fescue seedlings. Mesotrione can be used on grass seed blends that contain less than 20% by weight of fine fescue (creeping red, chewings, hard).

For extended control of weeds listed above, a second application of 0.08% mesotrione on fertilizer can be applied six weeks after the first application. A second application will aid in control of dandelion and perennials such as clover, ground ivy, and volunteer bentgrass. For extended season long control of crabgrass and foxtail, apply mesotrione in combination with a preemergence herbicide [such as Barricade® 65WG Herbicide/*insert product name*].

Fall Seeding: For control of crabgrass, common chickweed, mouse ear chickweed, henbit, corn speedwell, hairy bittercress, heal-all, knawel, woodsorrel, dollar weed, volunteer bentgrass, dandelion, white clover, black medic, hop clover, nimblewill, ground ivy, broadleaf plantain, buckhorn plantain, Carolina plantain, hedgeweed, old world diamond flower, knotweed, tufted love grass, Shepherd's purse, Florida pusley, common purslane, common lambsquarters, pigweed, kochia, wild violets, knotweed, and other broadleaf weeds, apply 187 pounds of fertilizer (0.15 pounds active ingredient per acre of mesotrione impregnated on fertilizer) per acre of turf. [Apply 4.3 lbs. of this product per 1000 sq. ft.] Apply to newly seeded or to over-seeded established plantings of the following grasses: Kentucky bluegrass, [centipedegrass], tall fescue, fine fescue (creeping red, chewings, hard), and perennial ryegrass. Mesotrione may reduce density of fine fescue seedlings. Mesotrione can be used on grass seed blends that contain less than 20% by weight of fine fescue (creeping red, chewings, hard).

WHAT TO EXPECT: Weed stems and leaves will begin to turn white within a few days of treatment. Weeds will turn brown and die. Two to three weeks may be required for complete control. Weeds not killed are often stunted and non-competitive in turf with flowering disrupted.

SPREADER TIPS (Optional)

Spreader Settings:

Scotts Drop Spreader	[XX]
Scotts Easy Green Rotary	[XX]
Scotts Speedy Green Rotary	[XX]
Cyclone Rotary	[XX]
Central Drop	[XX]
Sears Drop	[XX]
Ortho Drop	[XX]
Green View Drop	[XX]
Precision Drop	[XX]

For best results the product should be applied without skips or misses. Determine the correct amount of product for the turf area to be treated. For best results apply half the rate in one direction and the remaining half rate at right angles to the first application. This procedure will minimize the chances for color streaking and erratic weed control.
